

AWWA Certified Backflow Assembly Services

For your convenience, San Jose Water has compiled a list of backflow assembly testers that have been certified by the California/Nevada Section of the American Water Works Association. These individuals and firms have provided San Jose Water with proof of their current certification and have been authorized to work within our jurisdiction and our established policy guidelines. San Jose Water does not recommend or endorse any individual or agency listed. We are in compliance with the California Code of Regulations, (Title 17 Public Health). Please note that a plumbing permit may be required for installations. Please contact the Building Department Inspection Division of the city or town in which you are located for further information.
